Sales Performance Analysis

- **Regional Performance:** Compare sales performance percentage across regions .
- **Monthly Trend:** Track monthly sales report to identify popular region, best product, discount offerings, profit earnings.
- **Product Performance:** Rank products by sales, region, and profit to identify the products driving business value.
- **Customer Contribution:** Identify the top 10 customers by sales and profit to strengthen retention and account-management strategies.

Profitability & Discount Analysis

Monitor month wise discount and analyse its effects on product profit. A discount may increase sales volume while reducing the profit earned per order. Here a diagram is showed where discount band and Business decision has discussed.

Discount Band	Discount Range	Business Interpretation
No Discount	0%	Standard pricing; protects profit margin
Low Discount	1%-5%	Healthy discount; supports sales; increase profit margin
Medium Discount	6%-10%	Moderate discount
High Discount	11%-20%	Aggressive discount; may reduce profitability
Very High Discount	>20%	High-risk discount; use only for strategic promotions

Key Recommendations

1. **Focus on profitable growth:** Prioritize regions and products that generate both strong sales and strong profit.
2. **Control discounting:** Review high-discount transactions and establish discount thresholds based on margin.
3. **Monitor trends:** Use monthly performance tracking to identify changes across regions and product Performance.
4. **Region Wise Product Demand:** Monitor region wise product demand, profit margin, discount band respectively.
